PROFILE

I'm Hamzeh Nidal Al-Bawaneh, a third-year Artificial Intelligence student at Middle East University. I'm passionate about Machine Learning, Deep Learning, Computer vision and Robotics, with a strong commitment to developing advanced AI systems that connect theory with real-world applications. I have completed several courses and workshops focused on AI and robotics, which have strengthened my technical and analytical skills. My goal is to become a professional AI engineer capable of creating innovative and impactful intelligent solutions.

EXPERIENCE

AI Engineer, Internship with MetaServ

Project: MetaServ AI company | Duration: 11/2025-2/2026

- Participated in a project-based AI automation internship, designing and developing intelligent n8n workflows that integrated AI models, REST APIs, and business process automation, while delivering scalable, real-world automation solutions under project-driven requirements.

AI Engineer

Project: AI Floorplan Generator | Duration: 3 weeks

- Developed an AI-powered procedural floor plan generation system using Python, leveraging computational geometry, procedural generation, and constraint-based optimization to create realistic, customizable 2D building layouts based on land shape, budget, and user-defined requirements.

Hardware & Software Engineer

Project: Security Campus Robot | Duration: 1M

- Designed and built an autonomous line-following robot using ESP32-CAM, IR sensors, and motor control systems to patrol predefined campus routes.

AI Engineer

Project: AI-Assisted Public Threat Detection System | Duration: 3/2026-6/2026

- Designed and implemented a real-time computer vision system for public threat detection, leveraging YOLO-based object detection, image processing, model optimization, and a web dashboard to detect weapons and monitor security incidents.

Software Engineer

Project: Tic Tac Toe Game With AI | Duration: 2 M

- Designed and implemented a Python-based Tic-Tac-Toe game featuring three difficulty levels, including an AI opponent powered by the Minimax algorithm for optimal move selection.

SKILLS

- Tools & Platforms:** Jupyter Notebook, VS Code, VS, GitHub, Colab, N8N
- Programming:** Python, C++, Java Script, SQL
- AI & Machine Learning:** TensorFlow, PyTorch, Scikit-learn, YOLO, ONNX
- Computer Vision:** OpenCV, YOLOv8, Image Processing, Object Detection
- Automation:** n8n, REST APIs, Workflow Automation
- Robotics:** Arduino, ESP32, Linux, ROS2
- Soft Skills:** Problem Solving, Teamwork, Work under pressure, Time management

ACHIEVEMENTS

- Won the Innovation Award at the AI-Mafraq Artificial Intelligence Hackathon for developing an AI Floorplan Generator.
- Completed multiple AI and robotics workshops and certifications.

Education

Middle East University

Bachelor of Science in Artificial Intelligence\ Data Science

Expected Graduation: 2027

Certifications

- IBM** Artificial Intelligence Fundamentals
- CISCO** Data Analytics Essentials
- MCC** Python and AI Workshop
- ICPC** Amman Collegiate Programming Contest
- ICPC** Jordanian Collegiate Programming Contest
